Declaration of Conformity - RoHS, REACH, and POP (EU and UK)

Purpose of the Declaration

This declaration serves as evidence of compliance with the substance-related requirements of European and British legislation regarding RoHS, REACH, and POP applicable to the industrial computer systems manufactured and placed on the market by InoNet Computer GmbH.
For the products placed on the market by InoNet Computer GmbH within the European Economic Area (EEA) and the United Kingdom, we hereby confirm, to the best of our knowledge, the following:

1) RoHS

Our products comply with the requirements of

- Directive 2011/65/EU (RoHS), as amended by Directive (EU) 2015/863, as well as
- The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (SI 2012/3032), as amended (UK RoHS).

Based on EN IEC 63000:2018, we maintain the required technical documentation and have established appropriate procedures to ensure compliance with the applicable substance restrictions.
Based on our Product Compliance Process, the technical documentation in accordance with EN IEC 63000:2018, and the Material Declarations and Certificates of Conformity provided by our suppliers, our products, to the best of our knowledge, comply with the requirements of the aforementioned European and British RoHS regulations. According to the information available to us and within the framework of our product compliance process, restricted substances in our products do not exceed the applicable concentration limits.
Changes to substance restrictions as well as existing or new exemptions are continuously monitored and taken into account in our product development, procurement, and approval processes.
We are not currently claiming any RoHS exemptions of our own.

2) REACH

Our products comply with the requirements of

- Regulation (EC) No. 1907/2006 (EU REACH) as well as
- The REACH etc. (Amendment etc.) (EU-Exit) Regulations 2020 (UK REACH), as amended from time to time.

As a manufacturer and integrator of industrial computer systems, we evaluate the material and compliance information provided by our suppliers as part of our product compliance process.
Based on our product compliance process and the material and compliance information provided by our suppliers, our products, to the best of our knowledge, comply with the requirements of the applicable EU REACH and UK REACH regulations. According to the information available to us, our products do not contain any substances listed on the current Candidate Lists of the European Chemicals Agency (ECHA) or the relevant UK authority in a concentration exceeding 0.1% by weight (w/w) per product.
We continuously monitor updates to the European and UK Candidate Lists and fulfill the resulting legal obligations to provide information to our customers.

---

3) POP

Our products and the packaging materials used comply with the requirements of the

- Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POPs) and
- The Persistent Organic Pollutants Regulations 2007 (UK), as currently in force.

Based on our product compliance process and the material and compliance documentation provided by our suppliers, our products, to the best of our knowledge, comply with the requirements of the applicable EU and UK POP Regulations. According to the information available to us and within the framework of our product compliance process, prohibited or restricted persistent organic pollutants are not present in our products in concentrations exceeding the applicable limits.
Changes to the relevant legislation and substance lists are continuously monitored and taken into account in our product development, procurement, and approval processes.

---

4) Conformity Assessment

The assessment of RoHS, REACH, and POP compliance is based on supplier declarations, material declarations, Certificates of Conformity, test reports, and risk-based plausibility checks.
As a manufacturer of industrial computer systems, we ensure that the legal requirements relevant to our products are taken into account as part of our product development, procurement, and manufacturing processes.
Since we rely on information from our suppliers regarding material composition, parts of this declaration are based on the data provided to us. This data is regularly reviewed and evaluated as part of our supplier management process.
The technical documentation and the underlying supporting documentation are maintained in accordance with the applicable legal requirements and retained for the periods prescribed by law.

5) Scope of the Declaration

This declaration is prepared to the best of our knowledge based on the information available at the time of its preparation, the technical documentation, and the Material Declarations and Certificates of Conformity provided by our suppliers.
It describes the conformity of the products placed on the market by InoNet Computer GmbH with respect to the legal requirements specified in this declaration as of the date of its issuance.
This declaration applies exclusively to products from InoNet Computer GmbH in their delivered condition. Changes, repairs, upgrades, or other modifications to the product after it has been placed on the market that were not performed by InoNet Computer GmbH or expressly approved by it may affect the product's conformity and limit the validity of this declaration.
This declaration does not constitute any representations regarding specific product characteristics or guarantees beyond the statutory warranty and liability provisions. Statutory obligations regarding information, conformity, and product liability remain unaffected.
Changes to the underlying legal requirements, the components used, or new findings from the supply chain may require this declaration to be updated.

Taufkirchen, July 2026

Marco Wegerich
Head of Management Systems & Compliance
